CS 341 - Web Technologies
Activity 5
Due: 3rd December 2025

Attendance and Sessions

Context

We've reached the final stretch. So far, we've built the foundation of the system — user registration and login, course creation and joining, and course request handling and management.

In this Lab Activity, we now move to the core feature of the Attendance Management System: implementing attendance functionality.

This includes setting up attendance sessions, marking attendance, tracking student participation, and managing attendance records in each course.

Ashesi Honor Code applies!

Task

Your task is to ensure the following:

Faculty,Interns, and Teachers can:

- Create and manage class sessions
- Mark attendance

Students can:

- Mark attendance using a code
- View daily and overall course attendance reports

Submission

- The URL of the hosted updated website
- Comment a link to your GitHub repository
